To: GPT Custer Spur EIS c/o CH2M Hill

My name is John Barnard.
I am writing to urge you to study the effects of increased diesel exhaust on people with adult onset Asthma.
My wife has just been diagnosed with this disease
Studies prove that increased air pollution cause decreased respiratory health
Again, please study the impacts of increased diesel exhaust on people with adult onset asthma.

thanks
John Barnard

Please study what effect the proposed coal terminal at Cherry Pt. will have on the herring population in that area.

J.B.

From: John Barnard

I am concerned about the increased traffic on our urban railroads. How will this effect our emergency services such as fire + ambulances. Who will pay for any upgrades?

Our state government has just let
everyone know the dangers of
increased acidification on the waters
of Puget Sound. Please study the
effects of the coal on Cherry Points
marine environment concerning acidification.
Especially around the terminal itself.
