

# NO COAL EXPORT!

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services:

As a person of faith, I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

My faith requires that we be good stewards of creation. Shipping coal through Washington communities to be burned in China goes against religious values of stewardship, sustainability, and justice. Thank you for fully considering the impacts of this proposal. Docket Number COE-2012-0016

Thank you.

# NO COAL EXPORT!

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services:

As a person of faith, I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

My faith requires that we be good stewards of creation. Shipping coal through Washington communities to be burned in China goes against religious values of stewardship, sustainability, and justice. Thank you for fully considering the impacts of this proposal. Docket Number COE-2012-0016

Thank you.

As a person of faith, I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

My faith requires that we be good stewards of creation. Shipping coal through Washington communities to be burned in China goes against religious values of stewardship, sustainability, and justice. Thank you for fully considering the impacts of this proposal. Docket Number COE-2012-0016

# NO COAL EXPORT!

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services:

As a person of faith, I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

My faith requires that we be good stewards of creation. Shipping coal through Washington communities to be burned in China goes against religious values of stewardship, sustainability, and justice. Thank you for fully considering the impacts of this proposal. Docket Number COE-2012-0016

Thank you. Lisa Lee Priest

As a person of faith, I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

My faith requires that we be good stewards of creation. Shipping coal through Washington communities to be burned in China goes against religious values of stewardship, sustainability, and justice. Thank you for fully considering the impacts of this proposal. Docket Number COE-2012-0016

Thank you.
