"As a supporter of the proposed Gateway Pacific Terminal in Whatcom County, I encourage you to complete the environment impact statement process based on the same strict federal and state environmental regulations that have been protecting our region for years.

This proposed export terminal project present Whatcom County with an incredible opportunity to strengthen its economy and improve our area regions\' quality of life in an environmentally responsible way. We can - and must - grow the economy and protect the environment at the same time.

The critics make it sound like we have to choose between the economy and the environment. I believe that\'s a false choice. The Northwest has been a national leader in the trade industry for generations, and we can continue to lead the way in an environmentally conscious manner. The Cherry Point project will do just that.

As our region\'s economy continues to struggle, it is essential not to over-regulate or delay the approval process of this project.

I urge you to not stand in the way of creating new, much-needed Northwest jobs and strengthening our economy through increased exports by completing this environmental impact statement in a fair and expedient manner."
