Environmental Impact Statement Proposed Gateway Pacific Terminal/Custer Spur

Comment form

Please submit your comments on the Gateway Pacific Terminal/Custer Spur Environmental Impact Statement by January 21, 2013 to be included in the scoping summary report. Comments can also be submitted online at www.eisgatewaypacificwa.gov.

What part of the proposal does your comment relate to?

- Vessel
- Rail
- Industrial site
- Multiple/not listed

Does your comment relate to any of the following topic areas? Comments can relate to any topic. If your comment relates to any of the topics below, please check the appropriate box. (check all that apply)

Human environment

- Noise
- Air quality
- Human health
- Traffic or safety
- Other human environment topic

Natural environment

- Wildlife or vegetation
- Marine species, fish or fisheries
- Wetlands or streams
- Water quality
- Other natural environment topic

EIS Process

- Alternatives
- Areas of potential effect
- EIS regulatory process
- Other EIS process topic

The increase in marine vessel traffic will be significant. Spills and accidents are likely. Our oceans and ports are already subject to too many environmental insults. This one is not at all necessary for the public's good.

Also, since July 2010 there have been 39 coal train accidents in the US, an even further environmental catastrophe

I am concerned about the amount of rail traffic that would be generated by this project. This train will be 1 mile long, and will create 30 miles of coal train per day along the track. This will be disruptive to: ① our own port exports of produce from Eastern Washington, ② emergency response vehicles, ③ Amtrak ④ local commerce.

Don't do it!

This project sends 50 million metric tons of coal to China per year. The burning of coal is a direct contributor to global climate change, which is resulting in storms and floods our country (and China) can ill afford. Coal dust is very difficult to control. Each uncovered car loses between 500 lbs to a ton en route. Once airborne, the dust finds its way to our soil + water, and into human lungs.

Locomotive engines burn a particularly low quality form of diesel which leads to cardiovascular + pulmonary diseases (such as asthma). These are already leading causes of death, and children are particularly vulnerable.

Just say NO.
