

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

docket number: COE-2012-0016

I'm concerned that impacted communities
↑ coal exports will not fully
understand the full consequences
of this increased activity

Please study the impact of Cost benefit ratios to
all the communities impacted
by the increased rail traffic -
including impacts of more land coal.

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

docket number: COE-2012-0016

I'm concerned that ground water/aquifer impacts,
air pollution from trains, cost to
communities to upgrade rail infrastructure
to export coal to Asia

Please study the impact of shipping coal to Asia, rail traffic,
air pollution in communities, cross train traffic,
cost to communities to invest in new infrastructure,
to accommodate rail traffic, reclamation of
ground water

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that When China burns the coal we send to them
the polluted air will come right back here to us in
the U.S. We in the US have worked hard to decrease
toxic emissions. Why not keep coal in the ground. Then
we will all be more healthy.

Please study the impact of The good health of all our citizens.
Air quality, water quality and food quality
will all be negatively impacted by exporting coal
to China. Think of future generations who will
suffer.

NO COAL EXPORTS

I'm concerned that despite a huge reduction
The past two years in coal burning in
America and this due to greatly increased,
and cheaper fuel, namely, gas, you're being
asked to approve an unneeded commodity - COAL

Please study the impact of what if approved by the Army Corps
Engineers, will be a disaster to Montana farm
land, numerous cities on the route to the coast
and health effects world wide when burned.

There is no need in America for this project to
go forward for many, many reasons based
on science.

I'm concerned that the increased coal train traffic will decrease property values all along the tracks clear from the Powder River Basin to the West Coast, while causing increased public safety investment without contribution by the companies making the profit. Another impact is the ^{increased} risk of fire all along the track.
Please study the impact of increased fire along tracks; traffic stoppages in rural areas, such as between Mazon Junction and the next available traffic separated road crossing in the Billings area; How much public investment would need to be made per crossing to protect public safety.

I'm concerned that these trains will pollute my air
in both my school in Missoula, MT and
my families air in Spokane, WA.

Please study the impact of particulate matter/pollution
coming from the trains in the air
of Montana and Washington

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that the increased ^{Coal} train traffic
through Missoula & across MT. will
impact health from coal dust, delays at crossings,
increase local taxes, kill more wild life and threaten
the environment with more derailments.
Please study the impact of the impact of increased train
traffic through Montana & its communities,
impacts on wildlife an derailments on our
environment.

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that my quality of life and these
in my community will be greatly
reduced.

Please study the impact of noise, pollution, cutting
of communities and global impacts
especially relating to climate
change.

NO COAL EXPORTS

Dear Army Corps of Engineers, Washington Department of Ecology, and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, and transporting coal on trains through Montana to the West Coast. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying traffic and emergency responders. It would also dramatically expand strip-mining in Montana and Wyoming and escalate climate change. This project is simply so coal companies get the profit, China and Asia get the energy, and Montana pays the cost. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that just two train-loads of coal contains
an amount of carbon 4,450 times greater than the
daily reduction of carbon emission stated by Bozeman's
modest Community Climate Action Plan.

Please study the impact of global, human-caused climate change
(directly exacerbated by coal combustion-transport-
mining) and its relation to local initiatives ~~to~~ aimed
at climate stability.

I'm concerned that *permitting export terminals on the West Coast will harm Montana communities from the creek ~~to~~ west and will encourage building coal mines in MT.*

Please study the impact of *increased coal train traffic on communities: air, congestion, coal dust, costs to rebuild infrastructure to accommodate the added trains.*

I'm concerned that our whole environment cannot
withstand any more coal production. We
need New Clean Free Energy!
It is possible!

Please study the impact of all the pollution that
Coal generates and not just
the \$\$\$ it makes! Look up!
Please!
No More Coal!

I'm concerned that my children, who live in Missouri
will be affected by ↑ coal pollution, that our coal
will be exported to China + Asia, and the global
consequences of ↑ pollution there. The delay in
of emergency services is also one of my concerns
Please study the impact of these actions in the scope of
the Environmental Impact Statement

I'm concerned that THE MILLIONS OF TONS OF
COAL DUST THAT WILL BE RELEASED
EVERY DAY ONCE THE PROJECT HAS RAMPED
UP, WILL SERIOUSLY DEGRADE AIR/WATER QUALITY.

Please study the impact of SUSPENDED COAL DUST INTO
WINTER INJECTIONS, AND THE OVERALL
IMPACT OF 1.5 MILLION POUNDS OF
COAL DUST RELEASED INTO THE AIR.
AND WATER EVERY DAY
