Dear Army Corps, Governor Otter and Senators Crapo and Risch:

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through North Idaho. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from mine to port. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

COAL**

**Dear Army Corps, Senators Cantwell and Murray and Governor Gregoire:**

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

**Dear Army Corps, Senators Cantwell and Murray and Governor Gregoire:**

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

**T**hank you for your strong leadership in protecting Washington's land and clean water. I, the undersigned, strongly oppose the construction of coal export terminals in Washington that would pollute the air we breathe and the water we drink. Washingtonians are committed to investing in clean, renewable energy and a healthier planet. Building coal export terminals would undercut our state's efforts to reduce global warming pollution and provide leadership on climate issues. **Dear Army Corps, Senators Cantwell and Murray and Governor Gregoire:**

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

**Dear Army Corps, Senators Cantwell and Murray and Governor Gregoire:**

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

**Dear Army Corps, Senators Cantwell and Murray and Governor Gregoire:**

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals. Please act on this as quickly as possible, before any permits are issued, rivers are dredged, roads are built and irreparable damage occurs.

**Dear Commissioner Goldmark and other public officials:**

**T**hank you for your strong leadership in protecting Washington's land and clean water. I, the undersigned, strongly oppose the construction of coal export terminals in Washington that would pollute the air we breathe and the water we drink. Washingtonians are committed to investing in clean, renewable energy and a healthier planet. Building coal export terminals would undercut our state's efforts to reduce global warming pollution and provide leadership on climate issues. I urge you to use your full authority to prevent Washington from becoming a gateway for dirty coal around the world.
