Environmental Impact Statement

Proposed Gateway Pacific Terminal/Custer Spur

Comment form

Please submit your comments on the Gateway Pacific Terminal/Custer Spur Environmental Impact Statement by January 21, 2013 to be included in the scoping summary report. Comments can also be submitted online at www.eisgatewaypacificwa.gov.

What part of the proposal does your comment relate to?

- Vessel
- Rail
- Industrial site
- Multiple/not listed

Does your comment relate to any of the following topic areas? (check all that apply)

Human environment

- Noise
- Air quality
- Human health
- Traffic or safety
- Other human environment topic

Natural environment

- Wildlife or vegetation
- Marine species, fish or fisheries
- Wetlands or streams
- Water quality
- Other natural environment topic

EIS Process

- Alternatives
- Areas of potential effect
- EIS regulatory process
- Other EIS process topic

I am concerned about the global ramifications of the burning of coal. Can you please study the effect of the coal burning on the air quality of the atmosphere. How does coal burning in China affect the quality of air in other parts of the world?

I am concerned about the health of the beaches of Cherry Point, at the site of the proposed terminal. What are the effects of the new terminal on the marine life - both on the beaches and farther out into the Salish Sea - both during and after construction of the terminal. And the long-term effects on the marine life, ^{after} decades of use. And what are the effects once the terminal is no longer of use. Also please study the effects of the terminal on the fresh water environment in the vicinity - streams and wetlands - during & after construction.

I am concerned about the effects of mining for coal on human and environmental health.

Please study the effects on coal mining on noise, air quality, human health (both physical and mental), traffic, congestion, light pollution, wildlife in the mining area and along the rail tracks, fresh water quality of streams and wetlands in the mining area and along rail transportation routes - and all the wildlife & fisheries associated with these waters. Thank you.
