Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

☐ I'd like to volunteer!

Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

☐ I'd like to volunteer!

Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

☐ I'd like to volunteer!

Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively affect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exacerbating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

☐ I'd like to volunteer!

Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Dear Army Corps, Senators Merkley and Wyden, Governor Kitzhaber:

Currently, there are six proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole.
Until a full analysis of all environmental, health and economic impacts of all the coal export proposals is completed, I am calling on Governor Kitzhaber to put a halt to processing of any state permits for individual coal export projects. I urge you to conduct a comprehensive assessment of the cumulative impacts from all the terminals.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively affect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exacerbating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.
