

**Dear Army Corps of Engineers, Department of Ecology and Whatcom County:**

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively affect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exacerbating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

*Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.*

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively affect my community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exacerbating climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

*Signing this postcard makes you a participant in the Power Past Coal Community. As a participant, you'll stay informed and involved in the latest coal export news, information and action alerts.*

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively affect my community by **increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exacerbating climate change.** I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Dear Army Corps of Engineers, Department of Ecology and Whatcom County:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington, or anywhere in the Northwest. This proposal would negatively effect my community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, increasing shipping traffic and noise, damaging aquatic ecosystems at the terminal site, increasing the potential for serious shipping accidents and exasperating climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.
