

# no coal export ✓

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that *The barge and train traffic will hurt our tourism economy. I am also concerned with air and water quality as well as health concerns.*  
Please study the impact of ~~all~~ *environmental* *concerns (Air, water & noise pollution)* <sup>health</sup>  
*The full scope from the mine to final destination.*

**POWER PAST COAL**  
communities against coal export

# no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

communities against coal export

# no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that City traffic interrupted,  
new railroad tracks will need to be put  
in taking away land from Blvd park +  
erosion of the banks. Concerned about my  
health + the communities' childrens health  
Please study the impact of duets coal dust. Study the impact  
of coal trains have on each community  
they pass through - health, traffic,  
housing prices + attracting new businesses  
to Bellingham -

I'm concerned that The project enables still more CO<sub>2</sub> emissions at a time when we need to be limiting them.

Please study the impact of Recent Court of Appeals decision that allows the EPA to regulate greenhouse gas emissions. The scoping process should include the impact on emissions.
