

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Traffic, Pollution, Aquatic life

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that CONTINUING TO USE FOSSIL FUELS WILL INCREASE WORLDWIDE TEMPERATURE

Please study the impact of FOSSIL FUELS ON CLIMATE CHANGE!

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.
