

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community, ^{and money} by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

trains traveling to Canada through
Brewster, could neighbors
be questioned what side effects
do they see? All along the line

POWER PAST COAL
communities against coal export

no coal export

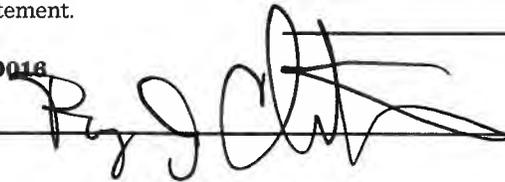

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that coal, in dust form or in smog form, is a poison! It kills people, acidifies lakes and oceans, and carries other poisons like mercury. Please study the impact of coal dust on the farm lands of Skagit County, and train diesel emissions on our air. Bunker oil emissions in the Puget Sound basin. Smog from China.

I'm concerned that these long, very heavy trains
will impact traffic flow significantly in our
community along with reduced air quality
from diesel + coal particles

Please study the impact of air quality en route
to terminal - noise pollution on
land + sea

I'm concerned that the pollution caused by burning coal is not only toxic where it is burned, but also toxic as it blows from China to the U.S.

Please study the impact of coal ~~burning~~ ^{the level of} the toxic & dangerous affects of burning coal, not only where it is burned, but also once it has blown across the Pacific Ocean from China to the U.S.

I'm concerned that increasing fire time that trains are moving through any city along the route will impair the response time for law-enforcement, ambulances & firefighters

Please study the impact of increased numbers of long trains running through Seattle, 4th Avenue & Bellingham, WA on the ability of law enforcement, ambulances & firefighters

to respond & ambulances to return to the hospital ER.

POWER PAST COAL
 communities against coal export

Dear Army Corps, Department of Ecology, and
Whatcom County Council:

EVERETT WA 98201

I am against the construction of a coal export terminal at Cherry Point, Washington and all plans to export coal through the Northwest. These proposals will hurt my community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, and worsening climate change. I strongly urge you to consider these threats in the scope of the Environmental Impact Statement.

Over + Paula Keitges
