

Dear Army Corps, Department of Ecology, and
Whatcom County Council:

EVERETT WA 982

I am against the construction of a coal export terminal at Cherry Point, Washington. This proposal would hurt my community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, and worsening climate change. I strongly urge you to consider these threats in the scope of the Environmental Impact Statement.

**Dear Army Corp, Department of Environmental Quality and
Whatcom County Council:**

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington. This proposal would negatively effect my community by **increase traffic, pollute our air and water, harm existing business, delay emergency vehicles, and exasperate climate change.**

I urge you to consider these impacts in the scope of the Environmental Impact Statement.

NO COAL EXPORTS FROM NW PORTS

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services:

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Docket number COE-2012-0016 ***Please print clearly**

NO COAL EXPORTS FROM NW PORTS

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services:

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Docket number COE-2012-0016 ***Please print clearly**
