

NO COAL EXPORTS FROM NW PORTS

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services:

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Docket number COE-2012-0016 ***Please print clearly**

NO COAL EXPORTS FROM NW PORTS

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services:

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Docket number COE-2012-0016 ***Please print clearly**

NO COAL EXPORTS FROM NORTHWEST PORTS

Dear Army Corps, Department of Ecology and Whatcom County Council:

I strongly oppose the construction of a coal export terminal at Cherry Point, Washington or anywhere in the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, delaying emergency responders, damaging aquatic ecosystems and fishing grounds at the terminal site, increasing tanker traffic and the potential for serious shipping accidents and escalating climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Dear Commissioner Goldmark, Army Corps of Engineers, Department of Ecology, and Whatcom County Council:

We strongly oppose the construction of a coal export terminal at Cherry Point, Washington. This proposal would negatively affect our community by increasing traffic, polluting our air and water, harming existing business, delaying emergency vehicles, and aggravating climate change. Building these export terminals will undercut our state's efforts to reduce global warming pollution and provide leadership on climate issues. We urge you to consider all impacts across the state and in our community in the scope of the Environmental Impact Statement.
