

# no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that this undertaking is counter productive to our future. The facts are clear CO<sub>2</sub> kills on a global scale  
train & ship traffic

Please study the impact of Coal dust, CO<sub>2</sub> on the health and well being of the inhabitants of our area who will be affected as to what degree. Please study the ethics of this proposal in terms of innocent and consideration of innocent everywhere.

Gary Piazza

communities against coal export

# no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that

~~is~~ The support and continued production of coal will severely hurt our earth. I go to western Washington University and I don't want to see Bellingham suff

Please study the impact of

water pollution ~~is~~ off of Cherry point

**POWER PAST COAL**  
communities against coal export

# no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that the coal export throughout the Pacific Northwest, Montana (my home state) and Canada will disrupt our climate, our roads, our cities, and our lives.

Please study the impact of your actions.

I'm concerned that

*the full impact of coal exports will not be covered with anything less than a full global analysis*

Please study the impact of

*coal removal in WA, coal dust disturbance along the coast, coal debris in Puget Sound, and climate change everywhere from burning coal*

Signing this postcard makes you a participant in the Power Past Coal community. As a participant, you will stay informed and involved in the latest coal export news, information and action alerts.

I'm concerned that the full impact of coal exports will not be understood without a study covering the extraction site & transport lines to Puget Sound terminal.  
Please study the impact of

coal extraction in WY, coal dust & other disturbance along the route & the effects of burning coal on the planet's climate.

I'm concerned that without alternatives, such as electric and (solar powered & wind etc) that we collectively won't be able to stop supporting use of coal.

Please study the impact of how to get the word out about alternative ways to exist in the absence of coal & oil! More electric cars! (" We want alternatives and be able to opt out of coal.

I'm concerned that The coal will damage human health at the  
mining, during train transport, (dust escaping), and burning with  
inadequate safeguards in China + elsewhere. Also will accelerate  
global warming

Please study the impact of coal dust, <sup>coal</sup>mining, and <sup>coal</sup>burning, on  
human health, global warming, fisheries, blockage of  
roads along the train routes.
