

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that the carbon from the coal

coming from the coal mines in the East and

transported across the country will cause

our globe even more devastating climate change and

rain peoples lives and health. Then on barges

across the waters can ruin our food supply

all while providing China with a dirty source

of energy. Beijing can hardly get worse - to even

see across a street. How is that good for health?

eyes, lungs etc) Bad for the Many: Costlives

for the few.

POWER PAST COAL

I'm concerned that diesel particulate matter will pollute the air we breathe. Not just from open coal dust on trains but also polluted air coming back to us from China. If smoke from fires in China can drift all the way to Bellingham (as docks & boats drifted to Wash. State shores from Japan's tsunami), then our air can be adversely & gravely affected.

Please study the impact of diesel particulate matter (measured now & estimated according to proposed increase in coal trains in our air both from coal trains in our state & B) from polluted air coming back to us after China (& other Asian countries) burn the coal that is exported to them.

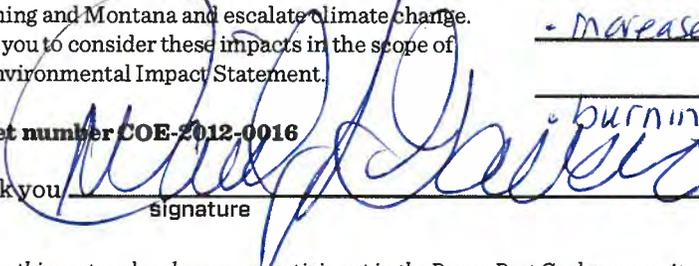

POWER PAST COAL

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that this project would significantly impact air quality and result in several other environmental stressors. Coal is an outdated energy source

Please study the impact of the entire project, including effects from mining the coal, then transporting it, then burning it. See the big picture. Don't hurt the environment to make someone very rich.

I'm concerned that the coal trains and the coal port, not to mention the pollution will degrade our environment and quality of life for living species

Please study the impact of all potential aspects of pollution - chemical, noise, etc AND the impairment of traffic, emergency, personal, & commercial - as it will affect lives, business, and health.

I'm concerned that The proposed transport of dirty coal via railcar and tanks is a threat to ^{the} environment and the health of our citizens as well as public safety.

Please study the impact of coal dust and diesel fumes on communities on the railcar route as well as the marine environment. The tankers will impact. And the disruption of emergency access.

I'm concerned that Coal that wouldn't be used within Washington state is being shipped elsewhere only to return to us as atmospheric pollutants. Delays are already a problem around Puget sound - this will further them

Please study the impact of Noise pollution and its effects on all marine life. @ Carbon, Nitrous Oxide, Mercury and sulphur emissions of Diesel used by the proposed number of trains and ships as well as the coal once burned.
