

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that

transporting coal

across the country & into the
U.S. will only have negative effects &
continue the dependence on fossil fuels.

Please study the impact of

the health risks involved
with coal trafficking & the

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that coal exporting will continue to degrade our environment, negatively affect the health of our communities, and ultimately lead to our demise.

Please study the impact of coal exporting before moving further & check out renewable energy sources instead. Thanks!

I'm concerned that the proposed coal export terminal is a terrible investment for our healthy air & water, and for a forward-thinking green-economy.

Please study the impact of the terminal on aquatic ecosystems, and consider the serious consequences of inevitable spills & accidents.

I'm concerned that the Columbia River Gorge - A NAT'L SCENIC AREA - will become nothing more than an industrial area due to the unbelievable increase in train traffic.

Please study the impact of noise pollution, air pollution and respiratory illness due to coal dust, damage to aquatic ecosystems & waterways & is this even an allowable use for a NAT'L SCENIC AREA? Seems not, to me.
