

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that the coal's affect on human
and surrounding life's health.

Please study the impact of coal and health.

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that increased train traffic, coal dust in the air, and other health issues from coal will mess up my community. Also, China has its own coal and nobody should be

Please study the impact of burning it any way. I've been fighting climate change instigated by humans for years and I'm convinced there is no such thing as clean coal. And other fossil fuels are bad too. It's time to take a stand to stop the foolishness. There are more jobs to be had through conservation.

POWER PAST COAL
communities against coal export

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that

traffic & safety along the rail line will be compromised by having so many trains running each day.

Please study the impact of

long wait times for traffic - and especially emergency vehicles - in well populated & slightly populated areas.

I'm concerned that

about the number of large ships in our waterways would be detrimental to the wildlife, as well as our recreational life.

Please study the impact of

the huge vessels in our waterways.

I'm concerned that marine fisheries, marine species
& marine life will be adversely affected
by building such a huge terminal.
Most especially concerned about the herring

Please study the impact of the building & operating
such a huge terminal on all marine
life.

I'm concerned that coal trains will block emergency vehicle access to our neighborhood. I'm also very concerned about air + water pollution from coal.

Please study the impact of coal export on global climate change and environmental degradation in the Pacific Northwest.

I'm concerned that

see left

It's ridiculous that rather than learn from our mistakes (W. Virginia) we're considering expanding strip-mining & promoting coal use rather than helping these countries

Please study the impact of

see left

build less polluting infrastructure from the beginning of their industrialization. Demand for coal is falling here because we know it's dirty + we're trying to clean up for the sake of the environment. Secondary it is nowhere else is completely counterproductive
