

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that allowing coal to be transported through the NW will damage NW communities both economical and environmentally, and will be a major step backward. At a time when the world is beginning to understand man's impact on the environment and coal use is diminishing, this action is proposing to counter that progress. We should not encourage increasing our reliance on coal. Also, this is a temporary step that could leave lasting damage because eventually even the coal buyer (China) will be developing their own renewable resources and selling that technology to us.

Please study the impact of _____

I'm concerned that the ships carrying coal to china will spill oil effecting the salmon and other marine fish & shellfish in our ocean and puget sound.

Please study the impact of ~~coal ships~~ ~~at~~ ~~port~~ ~~and~~
How an oil spill in puget sound would effect the (commercial) salmon fishery in the environmental impact statement.

POWER PAST COAL
communities against coal export

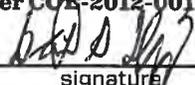

no coal export

Dear Army Corps of Engineers, Department of Ecology and Whatcom County Planning and Development Services,

I strongly oppose the construction of a coal export terminal at Cherry Point, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds at the terminal site, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that I live 1 block from the tracks
I'm concerned about having to wait while one of these long trains blocks the crossing in the event of an emergency (needing to get to the hospital, police being delayed getting to Bow, etc) there is no overpass at this crossing.

Please study the impact of _____

I'm concerned that the environmental impact - noise, pollution and picking up the slack of the coal cooperation will be destructive for my town and the planet.

Please study the impact of noise, air pollution, and what the cities have to provide for the infrastructure.

I'm concerned that the coal trains will only add to the negatives that our enlarging airport has already begun.

Please study the impact of on clean air, noise pollution and increased delays/traffic congestion affecting Bellingham. Also the impact on marine life/water pollution with the increased marine traffic.
